INTERFERENCE "Trilogy: green fragments"

"Trilogy: Green Fragments", the long awaited new record by Interference, will be available on Bandcamp.

Two years after "V1.1 / V1.2" the band has been locked into "La Fucina Studio" for the entire 2011 working on a sonical trilogy. Among the seven tracks of the first chapter you can find suggestive atmospheres and unexpected breaks.

The "green" episode offers an evolved and modern style. A strong musical identity which is worldwide appreciated and recognized as one of the most interesting projects coming from Italy.
